of Parking Garage Signage**

## About Us

---

We are the leading architectural signage fabricator in the tri-state area. Founded in 1972 by Babu Khalfan, Signs + Decal continues to set new standards for high quality signage.

For almost 40 years we have been manufacturing high-end architectural signage and have successfully completed large intricate signage projects with major contractors, developers, architects and designers.

We specialize in manufacturing and installing way-finding signage for parking garages, hospitals, universities, arenas, airports, hotels, residential, commercial buildings and more.

Due to the complexity of the sign industry, you will also get a team of skilled in-house craftsmen in manufacturing architectural signage in both of our plants. We are continuously upgrading our plants with state of the art equipment, using new technology, processes and materials keeping our environment in mind.

Orange, Red & Yellow Parking Garages  
at JFK International Airport in New York.  
Total 14 Levels.

City of Summit, New Jersey.

Main entrance to Citi Field parking lot, New York.
